Dear Chairman Howard:

I am writing regarding the potential water rate increase in our area. We are very distraught with the plan that is being put in place to increase water/utilities cost. With the economy the way it is, this will immensely hurt people in our community. We moved to Lake Wylie four years ago from Rock Hill SC. The biggest issue regarding cost that we dealt with in moving was our increase in our water bill. The first month of moving to Lake Wylie our water bill was hundreds of dollars. After that, we stopped watering our lawn, cut back substantially on water use of showers and flushing toilets. We now have a bill of about \$100 to \$120 monthly. This is an increase of about 200% from what we had in Rock Hill before moving to Lake Wylie. Our bill while living in Rock Hill was typically about \$30.00 monthly.

The Lake Wylie area is beautiful and has so much going for it, but one of the biggest complaints/concerns from people is the inflated water cost. By increasing prices further, it will hurt this area and especially hurt the value of our homes. People like us move to Lake Wylie to give our families a better way of life, and companies such as this (Carolina Water Service of SC) hurt communities. We are asking that you please deny the right to increase our Water Utilities in the area of Lake Wylie, SC. Thank you.
